

Watershed Health Assessment Framework (WHAF)

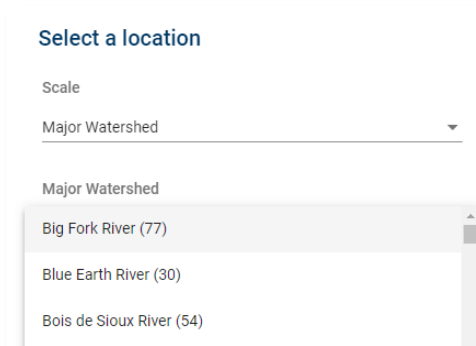

Land Cover Use Guide

Select a Location

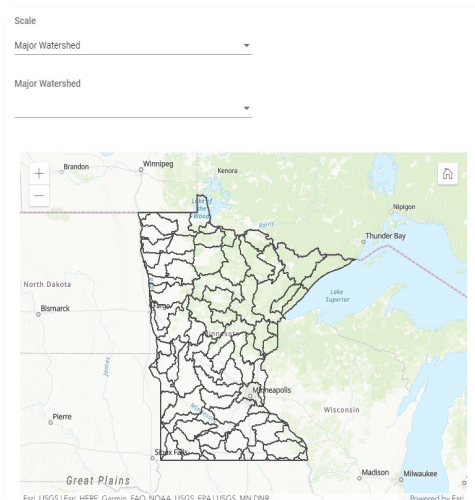

Set a location and boundary size to trigger the charts and tables that summarize land use data.

Option 1: Select a scale

- Select a boundary **scale** from the drop-down menu (e.g., Major watershed)
- Use the **second drop-down menu** to select a specific watershed by name.
- If catchment or upstream are selected, enter a number of your choosing in the text box.

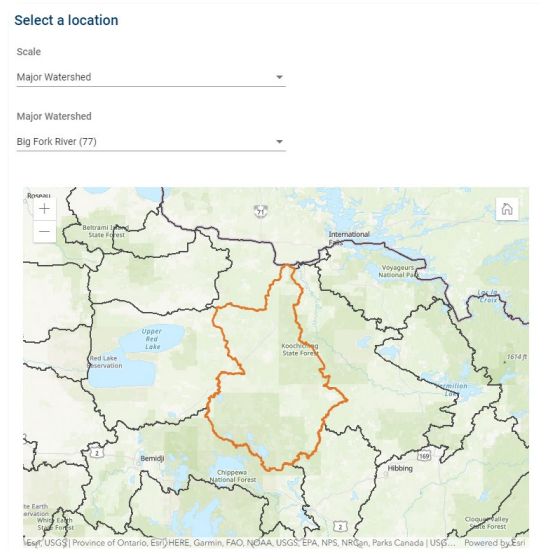

- **Or, click the map to select a location** once you have a **scale** selected (e.g., Major watershed).

Option 2: Set a location from the WHAF mapping application

If you enter this application from the WHAF web map, it will **load with the location and scale** you have already selected from the WHAF web map.

Land Cover Summaries

The application delivers different land cover data summaries including:

- Land cover
- Crop cover
- Crop history

You can select from different options to customize the summaries.

Chart options include:

- Select year(s)
- Select grouped/ungrouped land cover classes

Table options include:

In addition to the charting options, tables can also:

- Sort by field values
- Download as an Excel or CSV file

Water Use Summary

The application also delivers the water use data summaries. This data is only available when **selecting the upstream scale** from the scale dropdown menu.

Additional Resources

- **Data** background has been depicted on each visualization and tabular option (e.g., Land cover).
- You can **access the WHAF webpage** by accessing the **Menu**, and selecting **“Home”**.
- To **learn more about the application**, access the **Menu**, and select **“About”**.
- For **additional inquires**, you can contact us at **whaf.dnr@state.mn.us**.
